

# Office 365

Business is better with Office 365

Office 365

## Office Business Premium — a complete package for businesses

Office 365 comes with a range of subscription levels for organisations large and small, educational establishments and individuals. Office Business Premium is packaged for businesses and delivers desktop versions of all the Office apps your employees know and love, alongside online versions of Word, Excel and PowerPoint. One licence covers up to five phones, five tablets and five PCs or Macs per user — more than enough to give users full flexibility over when and how to work.

As well as the regular Office apps, users can benefit from an exciting range of business and collaboration tools, such as Skype, Business Center, Outlook Customer Manager, Bookings, Connections, Invoicing and more.

Included in Office Business Premium as standard is the same world-class email capability you get with Exchange Online. Users can access their email, contacts and shared calendars from anywhere with an Internet connection. With 50GB of storage, and the capability to send messages of up to 150MB, it's truly geared towards modern businesses. And if you lose your phone, it's really easy to wipe your data remotely without actually losing it, because it's synched across your devices and backed up to the cloud.

## Three great reasons to make the leap now

- Office Business Premium's easy and fast setup and management allows you to respond to an unpredictable market by being able to set up new users (or even whole departments/organisations) with all the productivity applications they need, at the touch of a button. This scalable approach means you never need to over-engineer your solution.
- With rising incidences of ransomware and data breaches, security is high on everyone's agenda. Microsoft has robust policies, controls, and systems built into Office Business Premium to help keep all your information safe — not just your email. And they guarantee 99.9% uptime.
- Your employees are most likely already using their own devices to make their work easier, so why not enable a bring-your-own-device (BYOD) culture that works for everyone? As Office Business Premium includes Office 365, there's no need for users to download and run unapproved software, meaning they're much less likely to encounter compatibility or security issues.
